

# Marie Tučková

(born 1994 in Prague, working and living in Prague, CZ)

**Marie Tučková** moves in the space between the media of text, performance, composition, video, drawing and installation. Her work explores the politics of listening, the hierarchy of voices, polyphony, various forms of collaboration and the overlapping of political and poetic language. Her work is based on improvisation as endless rehearsal (Wilson Harris) and song as manifestation.
